### AdMonkey The Number 1 Ad Platform

#### The Product

The application will be a pixel based advertising platform where users can submit image/text based ads to be displayed on publishers website(s).

Users will be able to pay using a CPC (Cost-Per-Click) or CPM (Cost-Per-Thousand-Impressions) valuation, similar to that of Google Ads and Pixl.

Our initial wireframe concept will be due for publishing in Q3 2021. This will be announced on our social media platforms and website.

**User Friendly**

Ease of use for our users is paramount, which is why our platform will be user friendly as standard.

**Quick & Easy Setup**

Nobody likes wasting time and we understand that at AdMonkey. We estimate it will take only 3 minutes to set up an Ad Campaign here at AdMonkey.

**Various Payout Methods**

Being restricted with payment methods isn't ideal. We allow deposits and withdrawals in a variety of currencies, including crypto & fiat!

**Scalable SaaS**

Having a platform which can adapt to large scale traffic increases is paramount, and that's exactly what AdMonkey can do!
