AUDIT DISCLAIMER

Brewlabs, a product arm of Healing Potion, provides paid due diligence in the form of audits for Binance Smart Chain, Ethereum and Matic tokenised projects within the cryptocurrency space. Before reading this audit report, we strongly encourage you to do your own research and ensure that you are only utilising the information provided as a secondary measure to help improve your decision-making. This audit will not protect you or your investment in any form and has only been created at the request of the token to provide general insight into the tokenised project. This audit does not serve as financial advice of any kind. Brewlabs cannot guarantee that any form of malicious or fraudulent acts such as exit scamming, liquidity removal or token sell off by team members will not occur. By reading this audit report, you understand that any information utilised by Brewlabs has been provided directly by the subject token. Brewlabs indemnifies itself from any misinformation provided by the subject token owners.

IMPORTANT: Cryptocurrency is considered a speculative market, always do your own research.

Live Chart

Contract Address:

0x7ba3cd00229c1becc95a4b056ff15c123dcb456d

Tokenomics

Features and Percentages:

1% for Weekly Jackpots (in SVT)

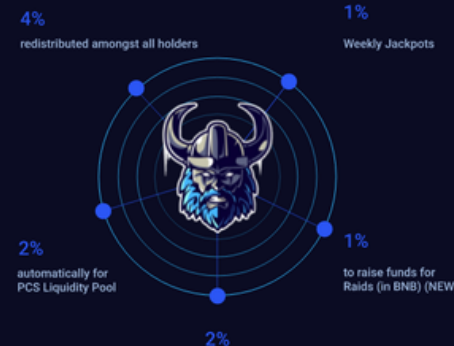

1% to raise funds for Raids (in BNB) (NEW)

2% for the Marketing Wallet (in BNB) (NEW)

2% automatically for PCS Liquidity Pool

4% is redistributed amongst all holders

= 10% tax on transactions

Jackpot

Here at Space Vikings we do Weekly Jackpots!

With our Tokenomics, 1% of every trade gets added to a Jackpot Wallet. Once every 7 Days this wallet is emptied to 50 of our random holders! The only requirement? Holders must hold more than \$50 worth of \$SVT in their wallet.

Community-Driven

As with everything else regarding this project, the community has helped out with the Jackpot. They decided there would be 50 winners with a maximum of \$5,000 per Jackpot.

Website & Branding Synopsis

- ✓ Contact methods and links to socials
- ✓ Website is Registered for one year
- ✓ SSL Certificate: Issued by Sectigo RSA valid 06/10/21
- ✓ Fluent and functional JavaScript, HMTL, CSS.
- ✓ Branding consistent, spell check, themed
- ✓ Mobile friendly

1 Functional

The desktop and mobile versions of the website are functional and structured. There were no issues found with misplaced elements or loading delays.

2 Structured

Future Token Use Case

The Space Vikings team plan to build future utility around the linked distribution of consumable products (beer) and the token.

9

Core Use

If successful in delivering the concept of a tokenised market behind an alcoholic/non-alcoholic beer product line, the Space Vikings project would be pioneering the link between cryptocurrency and real world consumable alcoholic beverages.

This is a very unique token use case.

8

Development Resources

The team at Space Vikings have

- 3 developers working as part of the project.
- 2 individuals working within the team in community management roles.
- 2 individuals working in marketing strategy and growth inclusive of the project lead.

8

Other Use Cases

- Introduction of the SVT decentralised swap platform.
- Considerable opportunity for additional use cases to be released upon successful launch of concept.

Possible Risk Evaluation

Risks identified by this report are for consideration only and do not encompass all potential risk with this project. The authors of this report strongly suggest you always do your own research when researching speculative markets.

External Market Risk

Such is the nature of any coin, token, or project within the speculative cryptocurrency market, external market risk is always present. External market risk can be defined as the volatility experienced within speculative markets.

Identified Risk Factors

- Possible legal and regulatory barriers may impact the core utility of this token.
- Limited utility use case for the token until Brewery partnership secured.
- Fee structure adjustable, flagged centralised risk between contract owner and community.

Possible Assurance Evaluation

Assurances identified by this report are for consideration only. The authors of this report strongly suggest you always do your own research when researching speculative markets.

External Market Risk

General Assurances

Classification: Unique

Such is the nature of any coin, token, or project within the speculative cryptocurrency market, external market risk is always present. External market risk can be defined as the volatility experienced within speculative markets.

- Space Vikings has a very unique use case and would be one of the first to integrate a token cryptocurrency in to the real world alcoholic beverages market.
- Viral possibilities.
- Full transparency and disclosure of team with supporting LLC.
- Multi-sig wallet precautions in place to limit centralised risk.
- Inclusion of key stakeholders when decision making.
- There is a community behind this project, with heavy interaction by the team driven by "Raids"
- The team have been very active and responsive in their community and social media.
- The code security audit requirements have been met.
- Taxes within the contract have been disclosed.
- Website security and functions are satisfactory.
- Key quality assurances have been met.
